Compare and Contrast

Comparison and contrast paragraphs are very important because they can be varied. You can choose to compare or contrast something. You can also do both. Comparing something means you notice the things that are similar about someone or something. When you contrast, you notice the things that are different about someone or something. Below you will find a list of writing topics. Each topic asks you to compare AND contrast in your writing. Be sure to use transitions when writing. It is extremely important for the reader to know when you are discussing similarities and when you are discussing differences.

Compare and contrast two different types of transportation.
